CONTENTS

FOREWORD ........................................................................................................... 7

Part I. ASSESSMENT OF COMPETITIVENESS IN EXTRACTIVE INDUSTRIES: METHODS OF MEASUREMENT AND STRENGTHENING TOOLS ................................................................................. 9

1. Comparative analysis of competitive advantages of Russian fertilizer companies
   (Diana DMITRIEVA, Andrzej KRASLAWSKI, Alina ILINOVA) .................. 11

2. Gap-analysis of the Russian federation coal industry
   (Yuriy VASILEV) ......................................................................................... 27

3. The competitive edge of the knowledge management system in the organizational capital of an industrial company
   (Tatyana PONOMARENKO, Izabela JONEK-KOWALSKA, Oksana MARININA) ............................................................... 41

4. Development of a methodology for assessing the effectiveness of arctic LNG projects based on the specifics of their implementation
   (Olga EVSEEEVA, Alexey CHEREPOVITSYN) ........................................... 59

5. Sources of value creation of a mining enterprise
   (Jolanta BIJAŃSKA, Krzysztof WODARSKI) .............................................. 73

6. Remedial restructuring as a way to extend the final stage of an enterprise based on the example of Polish hard coal mining
   (Izabela JONEK-KOWALSKA) .................................................................. 89

Part II. IMPROVEMENT OF PRODUCTIVITY IN EXTRACTIVE INDUSTRIES WITH THE USE OF ORGANIZATIONAL AND TECHNOLOGICAL METHODS ................................................................. 101

7. Consolidation in the hard coal mining sector: case study
   (Martia PODOBIŃSKA-STANIEC, Patrycja BAK) ...................................... 103

8. Parallax effect in research on community of practice
   (Jacek BENDKOWSKI) ............................................................................. 119
9. The optimal structure of coal output in a group of collieries
   (Adam GUMIŃSKI, Adam BOSOWSKI) ........................................ 133
10. Studying of the impact of calcium synthetic silicates and hydrated
    silicates structure on sorption processes
    (Alyona KUZHAEVA, Natalia DZHEVAGA, Igor BERLINSKI)........... 147
11. Removal and separation of lanthanides in polycomponent systems
    by ion flotation method
    (Natalia DZHEVAGA, Olga LOBACHEVA) ................................... 159
12. Mining output stream rate in the function of probability –
    calculations scheme for bidirectional shearer cutting
    (Ryszard SNOPKOWSKI, Marta SUKIENNIK, Aneta NAPIERAJ) ....... 173
13. Theory of inventory management with a view of stochastic models
    (Barbora FRANKOVÁ, Vojtěch MEIER) .................................. 189

Part III. SOCIAL AND ENVIRONMENTAL ASPECTS OF
MANAGEMENT IN EXTRACTIVE INDUSTRIES ............................ 203
14. The Corporate Social Responsibility practices in Australian mining
    sector
    (Radostaw WOLNIAK) ................................................................ 205
15. The relationship between indicators of non-financial reporting of
    polish companies
    (Marta PODOBŃSKA-STANIEC) .................................................. 219
16. Management of social infrastructure objects of the mining
    companies on newly-developed territories
    (Marina NEVSKAYA, Tatiana PONOMARENKO,
    Tatiana KOSOVTEVA) .......................................................... 233
17. The issues related to occupational health and safety culture in the
    mining industry
    (Patrycja BĄK, Marta Sukiennik, Mariusz KAPUSTA) ............... 247
18. Survey of staffing needs to implement projects on the Arctic Shelf
    (Alexey FADEEV, Anna TSVETKOVA, Alexey CHEREPOVITSYN) .... 261
19. Perception of environmental responsibility and risks in oil and gas
    industry in Russia
    (Iuliia GOMAN, Olga KOCHERGINA) ..................................... 273
