**Introduction**

**Public Higher Education Institutions**
- Universities: 12
- Universities of Technology: 16
- Universities of Economics: 20
- Universities of Agriculture: 21
- Universities of Medical Sciences: 22
- Universities of Arts / Academies of Music: 24

**Non-public Higher Education Institutions**: 26
Poland’s traditions of academic education go back to 1364, when King Casimir the Great established the Cracow Academy, known today as Jagiellonian University. The Cracow Academy, one of the oldest in the world, took after academies in Bologna and Padua, and was the second university in Central Europe after the school in Prague. Around two centuries later, in 1579, King Stefan Batory transformed the existing Jesuit College in Vilnius into the Vilnius Academy, and in 1661 John Casimir, King of Poland, converted the Jesuite College in Lviv into the Lviv Academy. Thus, by the end of the 17th century, the Polish-Lithuanian Commonwealth had three flourishing universities, providing academic education to both national and international students.

Today, the Polish higher education system is developing dynamically. Poland holds the fourth place in Europe (after the United Kingdom, Germany and France) in terms of the number of people enrolled in higher education. The total student population, at over 450 university-level schools, is almost 2 million. Each year, almost half a million young people begin their learning at higher education institutions here.

Polish university-level schools offer over 200 first-rate fields of study as an integral part of the European Higher Education Area. Most higher education institutions also offer their courses in foreign languages.

Poland plays an active part in the Bologna Process; owing to the introduction of a three-stage education modelled on the Bachelor/Master/Doctor template and the European Credit Transfer System, Polish students and foreigners studying in Poland stay fully mobile, and can easily continue their education elsewhere in the European Union. Within the Erasmus Programme alone, running for 25 years, almost 30 thousand foreign students have come to study in Poland, whilst almost 100 thousand students from Poland took a portion of their education in another European Union country. Foreign students coming to Poland can expect an attractive and diversified educational range meeting high European standards; they can study medicine, biotechnology and engineering, but also art and business. The diploma awarded to them upon graduation is recognized not only across Europe, but also internationally.

For students from outside the European Union who come to study in Poland, this may well mark the beginning of the fascinating adventure of discovering Europe: being invited to study in Poland means that you are invited to the European Union, of which Poland is an active member state. We invite you to discover the European Union, which offers not only varied, interesting cultures and the opportunities associated with strong, innovative economies, but also provides excellent conditions for successful higher education in a challenging and friendly atmosphere. With top-quality, internationally recognized degrees, almost no other region in the world can set your career off on such a promising start. This guide will provide you with the information you need to begin. Come to the European Union. Start from Poland!

OFFICIAL LANGUAGE: Polish.

POLITICAL SYSTEM: Parliamentary Republic

LOCATION: Central Europe. Poland borders Germany, the Czech Republic, Slovakia, Ukraine, Belarus, Lithuania and Russia (the Kaliningrad enclave). Its northern border (400 km long) runs along the Baltic Sea coast.

MAJOR CITIES: Kraków, Łódź, Wrocław, Poznań, Gdansk, Szczecin, Bydgoszcz, Lublin, Katowice, Białystok.

AREA: 312,685 sq. km. Poland is the ninth largest country in Europe (excluding Russia), and the sixth largest in the European Union.

POPULATION: 38 million. Poland has the seventh largest population in Europe (excluding Russia), and the sixth largest in the European Union.

TIME ZONE: Poland belongs to the Central European time zone (GMT + 1 hour / UTC + 1 hour), except for between the last Sunday in March and the last Sunday in October, when it switches to Daylight Saving Time.

CLIMATE: The Polish climate is moderately continental, with relatively cold winters (from December to March) and a hot summer, which extends from June to August. January average temperatures -5°C (23°F) to -1°C (30°F). July and August average temperatures range from 16.5°C (62°F) to 19°C (65°F), although on some days the temperature can reach 35°C (95°F).

HIGHEST MOUNTAIN: Rysy – 2499 m, located in the Polish Tatras.

NATIONAL HOLIDAY: Constitution Day, 3 May (1791).

CURRENCY: 1 zloty (PLN) = 100 groszy (actual exchange rates: www.nbp.pl).

DISCLOSURE CODE: + 48

INTERNET DOMAIN: .pl

ECONOMY: Poland is the 21st largest economy in the world and the ninth largest in Europe. Poland’s high-income economy is considered one of the healthiest of the post-communist countries and is currently one of the fastest growing within the EU.

INTERNATIONAL ORGANIZATIONS: Poland is a member of the European Union (EU), the Schengen Area, North Atlantic Treaty Organization (NATO), United Nations Organization (UN), International Monetary Fund (IMF), United Nations Educational, Scientific and Cultural Organization (UNESCO), United Nations International Children’s Emergency Fund (UNICEF), World Health Organization (WHO), World Trade Organization (WTO), Organization for Cooperation and Development (OECD) and many others.

__POLISH NOBEL PRIZE WINNERS__

Poland boasts six Nobel Prize winners:

**MARIA SKŁODOWSKA-CURIE**
(1903 – in physics; 1911 – in chemistry)

**HENRYK SIENKIEWICZ**
(1905 – in literature)

**WŁADYŚLAW REYMONT**
(1924 – in literature)

**CZESŁAW MIŁOSZ**
(1980 – in literature)

**LECH WAŁĘSA**
(1983 – Peace Nobel Prize)

**WISŁAWA SZYMBORSKA**
(1996 – in literature)
Poland conforms to the guidelines of the Bologna Process in the European Higher Education Area. A degree system based on the three-cycle structure has been successfully implemented, together with the European Credit Transfer and Accumulation System (ECTS). The European standard in higher education makes it easier for students to obtain recognition of their qualifications in other countries.

Cycles of Studies

At present, higher education institutions provide study programmes in accordance with the National Qualifications Framework for Higher Education. Curricula are designed on the basis of learning outcomes, defined by knowledge, skills and social competences. Students obtain qualifications at three levels (cycles) and two profiles (academic and practical).

Higher education institutions run full-time and part-time programmes. The full-time programmes are defined as the basic mode of study. For more information on programmes offered by Polish higher education institutions, please visit the Ministry of Science and Higher Education websites: www.nauka.gov.pl and www.poli.on.nauka.gov.pl.

1st Cycle

First-cycle studies (at least 3 years, leading to the professional title of "licencjat", and at least 3.5 years, leading to the professional title of "inżynier"). These are focused on preparing students for future employment, or for continued education within Master’s degree programmes. To obtain this degree, students must earn at least 180 ECTS credits.

2nd Cycle

Second-cycle studies – Master’s degree programmes (1.5 to 2 years) following first cycle studies, leading to the professional title of "magister" or an equivalent degree (depending on the study course profile). These are focused on theoretical knowledge, as well as the application and development of creative skills. In artistic disciplines, focus is on the growth of creativity and talent. Master degree holders may enter doctoral programmes (third-cycle studies). To obtain this degree, students must earn at least 90 ECTS credits.

Long Cycle

Long-cycle studies – Master’s degree programmes (5 to 6 years) leading to the professional title of "magister" or an equivalent degree (depending on the study course profile). To obtain this degree, students must earn at least 300 ECTS credits (5-year studies) or at least 360 ECTS credits (6-year studies). Single long-cycle studies are based on an integrated study programme, which contains both basic studies and in-depth specialization.

3rd Cycle

Third-cycle studies – Doctoral degree programmes (normally 3 to 4 years), accessible to graduates of the Master’s degree programme and leading to the PhD degree, are offered by university-type schools as well as some research institutions (departments of the Polish Academy of Sciences, along with research and development institutions). The PhD degree is awarded to candidates who submit and successfully defend a doctoral dissertation before the thesis committee, and who pass the doctoral examination.

Examinations

All higher education institutions are required to end their courses with examinations. There may be several independent examinations, or tests in separate parts of a subject. Usually, oral and written examinations are held at the end of each semester during the examination session. Students sit examinations on each subject separately. The performance assessment period covers either one semester or one academic year. To successfully complete a semester (or a year), a student must receive the pass mark (at least “satisfactory”) for all assessments and examinations in the subjects covered by the curriculum, and obtain performance assessment credits for all integrated placements.

ECTS Credits

In addition to the grading scale, Higher Education Institutions (HEIs) use the European Credit Transfer and Accumulation System (ECTS), under which a certain number of credits are allocated to a given subject, independently of marks awarded. To complete a year successfully, the student has to collect at least 60 credits (30 per semester). The ECTS (European Credit Transfer and Accumulation System) is the standard that was adopted by all universities in the European Higher Education Area (EHEA) during the process of convergence between Europe’s higher education systems. Since 2007, all Polish higher education institutions are required to use ECTS for both credit transfer and accumulation within their degree programmes. The ECTS credits allow foreign students’ periods of study at HEIs in Poland to be recognized.

Grading

Each HEI identifies its grading scale in its Study Rules. The most common scale comprises the following marks:

Grade Description

- **5 very good** ("bardzo dobry")
- **4 good** ("dobry")
- **3 satisfactory** ("dostateczny")
- **2 unsatisfactory/fail** ("niedostateczny")
- **credit/pass** ("zaliczenie")

Sometimes the plus symbol or decimal points are used to modify numerical grades. It must be pointed out at this time that grades awarded according to this scale are not directly transferrable to ECTS credits.

Please bear it in mind that the educational systems of many countries may differ significantly from your own, and that Poland may belong to this group.

The differences begin with terminology: in English, the three basic higher education degrees - Bachelor, Master and Doctor - have a variety of abbreviations, depending on the actual field of study (the BA and BSc, MA, MBA and MSc, PhD and DSc, etc.). In Polish, there are four main terms referring to academic titles/degrees: "licencjat" or "inżynier" (the equivalent of Bachelor, i.e., the initial part-second education degree), "magister" (the equivalent of Master) and "doktor" (the equivalent of Doctor), regardless of whether you graduate in the arts or in molecular biology.

However, individual degrees may not be fully compatible with the degrees conferred by the higher education system of your country, and we strongly recommend that you check with your school or the public authorities which degree you will be bringing home (according to domestic legislation) after graduation from a Polish school.

For more information on the adjustment to the Bologna Process and ECTS credits please visit: www.mninw.gov.pl and www.nauka.gov.pl. (Ministry of Science and Higher Education, general information on the Bologna Process)

In order to graduate, students are required to:

- pass a performance assessment for all subjects, integrated placements and practical work sessions, and pass all examinations covered by the study program for a given field of study,
- present, at an appointed date, a diploma project, and obtain the pass mark for the project,
- pass the diploma examination.

Upon graduation, the student receives a diploma of completion of studies in a specific field of study, together with a diploma supplement (a document that accompanies a higher education diploma, providing a standardized description of the nature, level, context, content and status of the studies completed by its holder).

DIPLOMA

Further information about studying in Poland is also available on the websites of the Conference of Rectors of the Academic Schools in Poland (www.krasp.org.pl) and the Study in Poland Project (www.studyinpoland.pl).

Detailed information on recruitment (the documents and the procedure of qualification) is available on the website of each university mentioned in the brochure.

STUDYING IN ENGLISH

Polish higher education institutions offer a diverse range of study programmes in both Polish and English, and the number of degrees presented in English is growing. Every institution publishes online information about the fields of study in which it offers programmes. The Ministry of Science and Higher Education website contains extensive information for prospective students, including a list of higher education institutions in Poland (see www.go-poland.pl / www.nauka.gov.pl / www.pol-on.nauka.gov.pl).

Detailed information on recruitment (the documents and the procedure of qualification) is available on the website of each university mentioned in the brochure.

THE COSTS OF STUDYING IN POLAND

Full-time studies (in the Polish language) at public Higher Education Institutions (HEIs) are free for Polish students and foreigners who commence studies in Poland on terms applicable to Polish citizens. These include citizens of the EU/EEA and students who hold the Polish Charter ("Karta Polaka"). All other foreigners are required to pay tuition fees of no less than:

- EUR 2000 per year for vocational higher studies, Master’s and postgraduate programmes,
- EUR 3000 per year for doctoral, postgraduate and specialist courses, as well as scientific, artistic, specialist and post-doctoral internships,
- EUR 3000 per year for vocational courses and apprenticeships,
- EUR 2000 per year for a language course, including preparation for studying in Polish.

The fees at non-public higher education institutions are established by the institution itself. These range from EUR 2000 to 6000 per year, and depend on the institution and study programme (for medical schools and MBA programmes, approx. EUR 8000-12000 per year).
ADAM MICKIEWICZ UNIVERSITY IN Poznan

undergraduate studies: Bachelor programme (6 semesters)
- Polish studies
- English language teaching
- English and Celtic studies
- Dutch studies (in English and Dutch)
- English philology
- English and Afrikaans, South-African philology
- German and Polish Law (in German)

graduate studies: Master programme (4 semesters)
- international Master in Balkan studies (IBS)
- cultural studies – intercultural communication
- English and Celtic studies (in Welsh and in Irish)
- English philology
- applied cognitive linguistics
- language and communication in media and politics
- civilization of English-speaking countries
- philosophy and American literature
- English and Polish translation
- international Master in chemistry (SERP-Chem)
- European Master in science of performative creativity (MSPC)
- European Master in classical cultures (EMCC)
- conference interpretation - Polish-English-French-German
- civilization of English-speaking countries
- philosophy and American literature
- English and Polish translation
- international Master in chemistry (SERP-Chem)
- European Master in science of performative creativity (MSPC)
- European Master in classical cultures (EMCC)
- conference interpretation - Polish-English-French-German

JAGIELLONIAN UNIVERSITY IN KRAKOW

undergraduate studies: Bachelor programme (6 semesters)
- physics, specialization: physics with computer science
- English philology
- artistic education

graduate studies: Master programme (4 semesters)
- mathematics, specialization: education, finance and insurance
- physics, specialization: physics with computer science
- English philology
- artistic education

graduate studies: Master programme (4 semesters)
- general physics
- chemistry, specialization: chemical processes and applications
- chemical engineering
- chemistry, specialization: chemical processes and applications
- chemical engineering

UNIVERSITY OF GDANSK

undergraduate studies: Bachelor programme (6 semesters)
- general business
- general physics
- chemistry, specialization: chemical processes and applications
- chemical engineering
- chemistry, specialization: chemical processes and applications
- chemical engineering

graduate studies: Master programme (4 semesters)
- international business
- general physics
- American studies

graduate studies: Master programme (4 semesters)
- international business
- general physics
- American studies
- European Union studies
- European studies

MARIA CURIE-SKLODOWSKA UNIVERSITY IN LUBLIN

undergraduate studies: Bachelor programme (6 semesters)
- computer science
- mathematics and actuarial mathematics

graduate studies: Master programme (4 semesters)
- computer science
- mathematics and actuarial mathematics

KAZIMIERZ WIELKI UNIVERSITY IN BYDGOSZCZ

undergraduate studies: Bachelor programme (6 semesters)
- mathematics, specialization: mathematics
- physics, specialization: physics with computer science
- English philology
- artistic education

graduate studies: Master programme (4 semesters)
- mathematics, specialization: education, finance and insurance
- physics, specialization: physics with computer science
- English philology
- psychology - long-cycle programme (10 semesters)

UNIVERSITY OF SILESIA IN KATOWICE

undergraduate studies: Bachelor programme (6 semesters)
- general physics
- chemistry, specialization: chemical processes and applications
- chemical engineering
- chemistry, specialization: chemical processes and applications
- chemical engineering

graduate studies: Master programme (4 semesters)
- general physics
- chemistry, specialization: chemical processes and applications
- chemical engineering
- chemistry, specialization: chemical processes and applications
- chemical engineering
UNIVERSITY OF WARMIA AND MAZURY IN OLSZTYN
WEB: www.uwm.edu.pl
PHONE: +48 89 523 39 26

graduate studies: Master programme (3 or 4 semesters)
- political science, specialization: international political and economic relations (4 semesters)
- geodesy and cartography, specialization: geodesy and real estate appraisal (3 semesters)
- geodesy and cartography, specialization: geodesy and satellite navigation (3 semesters)
- fisheries, specialization: aquaculture and fish-keeping (3 semesters)
- medicine, specialization: general medicine, long-cycle programme (10 semesters)

undergraduate studies: Bachelor programme (6 semesters)
- astronomy
- English philology
- physics

graduate studies: Master programme (4 semesters)
- mathematics
- automatics and robotics
- computer science – double diploma
- information technology
- electrical engineering

THE UNIVERSITY OF WIEJSKA
WEB: www.wuw.edu.pl
