## COURSE DESCRIPTION

<b>1. Course title: REGIONAL PLANNING</b>		<b>2. Course code:</b> RAR-A-SSII-III-RP		
<b>3. Validity of course description: 2018/2019</b>				
<b>4. Level of studies: MSc programme</b>				
<b>5. Mode of studies: Full-time studies</b>				
<b>6. Field of study: Architecture</b>				
<b>7. Profile of studies: general academic profile</b>				
<b>8. Programme: -</b>				
<b>9. Semester: 3</b>				
<b>10. Faculty teaching the course: Faculty of Architecture, Department of Urban Designing and Spatial Planning</b>				
<b>11. Course instructor: Professor Krzysztof Gasidło PhD DSc Eng. Arch.</b>				
<b>12. Course classification: major</b>				
<b>13. Course status: compulsory</b>				
<b>14. Language of instruction: English</b>				
<b>15. Pre-requisite qualifications: BA in architectural and urban designing, local planning. Basics in sociology and economics</b>				
<b>16. Course objectives:</b> Knowledge and skills to understand the links between local, regional and national planning, to collect, analyse and process materials for spatial development plans and studies covering groups of communes and region, define spatial development conditions at regional level, formulate proposals for local planning.				
<b>17. Description of learning outcomes:</b>				
Nr	Learning outcomes description	Method of assessment	Teaching methods	Learning outcomes reference code
1	He/she knows different issues of regional planning in Poland and the European Union.	test	lecture	
2	He/she understands the interdisciplinary nature of regional planning, in particular its links to social, economic and natural sciences.	test	lecture	K2A-W07
3	He/she understands and recognize the non-technical determinants (socio-economic planning, regional co-operation) for large scale engineering activities in the country or region.	test	lecture	K2A-W08
4	He/she is able to collect, classify and analyse information about space (natural, technical and social environment - including the economy).	discussion	MA seminar	K2A-U12
5	He/she is able to interpret and explain social phenomena and interrelations between people, the built environment and natural environment, interpret them spatially on a regional scale, and prepare assumptions for regional planning	Essay with a preliminary concept	MA seminar	K2A-U08
6	He/she can identify and resolve dilemmas associated with performing a specific task.	discussion	MA seminar	K2A-K01
<b>18. Teaching modes and hours</b> Lecture 15 / BA /MA Seminar 30 / Class / Project / Laboratory				
<b>19. Syllabus description:</b> <b>Lectures:</b> Concept of the region, objectives and scope of regional planning. The emergence and development of national and regional planning. Local and supra-local spatial planning in the management system in Poland.				

Formation and implementation of spatial policy of state and voivodeship. The concept of spatial development of the country. Development strategy of the voivodeship. Spatial development plan of the voivodeship. Methodology of regional planning. Forms and records of regional plans. Formation of settlement in the country and in the region. Theories of settlement. Land use on a regional scale. Processes of urbanization and metropolization. Social determinants and economic activity in regional planning issues. The problem of housing and public spaces in the regional dimension. Environmental and natural conditions of regional development. Built environment and cultural heritage in regional planning. Transportation and communication, water and energy management at national and regional level. The rise and development of the Upper Silesian agglomeration.

**Seminar:** Study and analysis of spatial planning of selected metropolitan functional area or a county covering at least: A. Basic elements of the settlement network and their communication and infrastructure links, B. A system of protected areas including areas for the protection of the environment, nature, cultural landscape. C. Distribution of publicly-funded investments of supreme importance, in particular social, technical, transport, tourism, water management facilities. - Preparation of assumptions for supra-local planning activities of a regulatory or creative nature

**23. Total workload required to achieve learning outcomes**

Lp.	Teaching mode :	Contact hours / Student workload hours
1	Lecture	15/15
2	Classes	
3	Laboratory	
4	Project	
5	BA/ MA Seminar	30/30
6	Other	15/15
	Total number of hours	60/60

**24. Total hours: 120**

**25. Number of ECTS credits: 4**

**26. Number of ECTS credits allocated for contact hours: 2**

**27. Number of ECTS credits allocated for in-practice hours (laboratory classes, projects): 0**

**26. Comments:**
