

# noiseCOM

an efficient  
miniature communication system  
for noisy environments

Integrated passive noise isolation, active noise reduction,  
speech intelligibility enhancement, wireless communication

# noiseCOM

- in-ear speech acquisition
- ergonomic earplugs
- IP-67 compliant hard sustainable case
- wireless communication between a number of users
- battery charged via USB connector

- three users allowed to speak at the same time
- transmission of alarms, warns and orders
- long operation time, up to 8h
- transient effects free
- fixed-parameter active noise control
- presets for various types of noise
- high total wideband noise reduction, up to 30 dB
- high SNR of broadcasted speech, up to 23 dB
