Google Software Engineer, PhD (Early Career) - Warsaw, Poland

Turn Your Research into Global Reality

We are partnering with Google to find PhD researchers to bridge the gap between theory and global-scale engineering. Tackle massive challenges in AI Infrastructure, Cloud, and ChromeOS.

The Mission:

- Apply Research: Solve complex problems in foundational computing.
- Lead: Drive design and build resilient, high-performance systems.
- Impact: Move your ideas from the lab to billions of users.

Requirements:

- PhD candidate (CS or related) graduating/available in 2026.
- Strong coding skills (C++, Python, Java, or JS).

If you have a disability or neurodivergence, apply now at:
employ-ability.org.uk/students-and-universities/internships

Applications are filled on a rolling basis
