

RESULTS OF THE COURSE SELECTION FROM UBZO FOR THE ACADEMIC YEAR 2026/2027

CLASSES WITH AVAILABLE SPOTS

winter semester - on-campus	summer semester - on-campus
Practical applications of electronics in everyday life	Global environmental and technological challenges of the 21st century
Metallurgy of welding	Theory of Chess
Application of CFD methods in engineering practice.	Application of CFD methods in engineering practice.
Strength analysis of implants and tissues with finite element method (FEM)	Structures and sport aerodynamics
Theory of Chess	Metallurgy of welding
Basics of cognitive analytics	Practical applications of electronics in everyday life
Future separation technologies – from clean water to space technologies	Advanced materials and technologies in automotive engineering
Combustion	Fundamental of electrical installation.
	Thermal and Mechanical Stresses
	Air pollution - from source to health effects
