

SYLLABUS

Name: Logistics enterprises management (ZIPAOZ>SM1LEM23S)

Name in Polish:

Name in English: Logistics enterprises management 2022/23 2s

Information on course:

Course offered by department: Faculty of Organization and Management

Course for department: Silesian University of Technology

Default type of course examination report:

EGZ

Language:

English

Course homepage:

<https://platforma.polsl.pl/roz/course/view.php?id=401#>

Short description:

The aim of the course is to introduce the main skills of a qualified logistician include inventory management, purchasing, transportation, warehousing, consultation, and the organizing and planning of these activities. Logisticians combine a professional knowledge of each of these functions to coordinate resources in an organization.

Description:

Lecture 1 Introduction to Logistics Business Management - basic definitions

Lecture 2 Logistic system

Exercise 1 Designing an enterprise logistics system

Lecture 3 Logistics activities and fields. Procurement Logistics Management - Selection of suppliers

Exercise 2 Evaluation of suppliers

Lecture 4 Warehousing

Exercise 3 Warehouse building project

Lecture 5 The location matrix

Exercise 4 Determining the location codes

Lecture 6 Packaging in Logistics Enterprises Management

Exercise 5 Packaging design

Lecture 7 Inventory management

Exercise 6 ABC/XYZ analysis

Learning outcomes:

E1 At an in-depth level - selected facts, objects and phenomena, as well as methods, theories and conditions explaining the complex relationships between them and constituting advanced general knowledge in the field of mechanical engineering in connection with other fields. K2A_W01

E2 Basic processes taking place in the life cycle of technical devices, facilities and systems. K2A_W03

E3 Use the acquired knowledge - formulate and solve complex and unusual problems and innovatively perform tasks in unpredictable conditions by:

-proper selection of sources and information derived from them; evaluation of the information, its critical analysis, synthesis, creative interpretation and presentation,

-selection and use of adequate methods and tools, including advanced ICT techniques,

-adapting existing or developing new methods and tools. K2A_U01

E4 When identifying and formulating specifications for engineering tasks and solving them:

-use analytical, simulation and experimental methods,

-see their systemic and non-technical aspects, including ethical issues,

-make a preliminary economic assessment of proposed solutions and undertaken engineering activities." K2A_U03

E5 Critical evaluation of the acquired knowledge and received content. K2A_K01

Assessment methods and assessment criteria:

Credit conditions:

}Lecture - writing a test on the subject based on lecture materials - 50%;

}Exercises- realization of exercises in groups of 2 persons for a fictitious company (with an established business profile) - 25%;

}Project - preparation of a presentation of Logistics Enterprises Management on the example of selected company - 25% (an example may come from the internet, but it must be labeled with own commentary).

Element of course groups in various terms:

Course group description	First term	Last term

Course group description	First term	Last term
<i>missing group description in English</i> (ZIPAOZ>SM1-23-O)	2023/2024-Z	

Course credits in various terms:

Management and Production Engineering, full-time master degree studies 3 sem. (ZIPAOZ-SM3)			
Type of credits	Number	First term	Last term
European Credit Transfer System (ECTS)	5	2023/2024-Z
